

INFORMATION SHEET

PREMIUM DECOR BALCONY COVERS

We sew the balcony covers using a very strong Premium Decor fabric with 200g/m² grammage, impregnated to protect against light rain as well. Owing to this special material, the covers provide almost 100% shade. As a standard, they are available in four colours: white, beige, ashen (grey) and green. Owing to the neat finish, they can be installed on various balconies. They decorate the railings on which they are fitted, ensure discretion, give shade, and protect against wind and rain. They are valued for their functionality, beautiful look, easy use and non-invasive installation, adjustment to various railings, and compatibility with other products of our company.

Note! When choosing a product, please read the instructions for use.
